Steers flowed very well through the yards & draft at assessment with most very quiet needing more push then steady through gateways. Steers have been in hand for up to a week with the last of them being weaned on 19/10/25. Steers will continue to be moved between yard until delivery on hay. Odd steer stirred in smaller yard and crush but settled straightaway once back with mob.

Assessor Comments	Buyers 96 VGQ PCAS eligible Santa & Santa X weaned steers that have all the right bloodlines and genetics and are best described as large frame relative to age. Steers have a good performance record and will suit to grow out as heavy feeders or bullocks showing plenty of bone, length, frame and confirmation. This line of steers have been weaned for over a week at delivery being well educated by vendor through the yards. A reputable line of cattle for sale that will be ideal to put away on grass or crop and grow out to heavier weights. Buyers please note the big curfew prior to weighing very hot conditions so expect good gains to be had. Also please note that horned cattle have minimal horn with most being on buds.
