Assessor Comments	Offered on behalf of a long-term local breeder. A small line of Droughtmaster heifers that were not joined due to the owner's illness over the past 18 months. The heifers are mostly quiet and well-handled with bikes, dogs, horses, and helicopter. They have been running on very dry forest country, with some showing rough coats, though they remain strong and healthy. The heifers are well-bred from a stud background, with two by a Red Brahman bull. One light yellow heifer, with the balance red in colour. Vendor has preg-tested empty by scan machine and pre-treated with Ausmectin (Ivermectin 5g/l) on the 21/10/25. The line includes one late No.5 and the balance No.3s, good medium to larger-framed types. A genuine small run of well-grown Droughtmaster heifers that should travel well and respond quickly to improved feed.
