Notable Traits		
	Traits	
	2 Head	Ring Worm Scarring

Assessor Comments	Buyers 128 PCAS eligible Santa/Angus/Droughtmaster X steers that present with plenty of frame and have been weaned for 3 months. Steers show good bone, length & depth being ideal to put away on crop or fresh feed and grow out to heavy feeders or bullocks. Steers were weaned in August and have been running on a combination of red mulga country with access to softer creek flats with good herbages. Steers were assessed after a large curfew so expect buyer to see good compensatory gain once back on grass. At assessment 2 x head were noticed with some old ring worm scarring but not seen as detrimental.
