Totals			**55%**	**45%**	**100%**

Comment on Fat Score 1 Cattle: The score 1 steers in the lot are certainly fit to travel any required distances.

Vendor Bred: Yes

Stock History: These are the male progeny of calves that were on cows purchased as cow/calf units ex: Thargomindah Station" back on 1st August 2025. The female herd was originally an Angus herd but have had Santa bulls over them for many generations

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Grazing Conditions: Stock have been running on mainly Mulga country supported by excellent winter herbages and Buffel grass. Been one of the best winter seasons on record.
Returned to: In yards being fed lucerne and oaten hay daily.

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Chemical Residue: Clear - No known history.

Vendor Comments: The red steers in this lot are probably F2 to F3 Santa x Angus and the blacks might only be F1's. No steers have had any grain or antibiotics so are suitable for any grassfed programs.

Temperament	Yards	Crush	Paddock
	Quiet: 45 head	Quiet: 43 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

These weaners have been handled properly with the right fundamentals using low stress stock handling. They have been tailed daily and also run through the yards daily. You can definitely see that in the yards that they have been handled very well. Very easy to walk around and have been educated to the best off their ability. Would advise the purchaser to allow sufficient time for these to settle on arrival before they are shown the "bush gate".

Handled With: Aerial (Helicopters, gyro's and planes) , Bikes , On foot

Notable Traits

	Traits
2 Head	Ring worm scars on head

Assessor Comments: Buyers, a line of good to very good quality flatback weaner steers that are available. They show good growth and weight for age considering they are only 4-6 months old. These should develop and mature into top quality export or domestic feeders if they are exposed to good feed conditions. They are ex: Thargomindah Station bred steers that were initially a straight Angus herd but have been bred using Santa bulls over them for many generations. They have been very well weaned and are super quiet to handle so I think they would hit the ground running wherever they end up. They presented in excellent health and don't look to have suffered any setbacks at any stage of their life to date except maybe one steer that looks to have been self-weaned early and has dried out a bit condition wise (see video). These were weighed after a 16-hour dry curfew. Buyers urged to buy the other heavier line of 117 steers to fill up a 4.5 deck unit.

Assessor: **Bob Jakins (Level 1 Accredited)**

Delivery Period	01/11/2025 to 04/11/2025 (4 days)
Delivery Point	"Coolbinga" yards, 37kms east of Quilpie and 173kms west of Charleville on Diamantina Dev. road. Lat: -26.613996336509 "S Lng144.611698957889 " E
