1 Head	V62 - Pink eye scar (mild)

Assessor Comments	.As part of the Warren Ag dispersal, 37 genuine replacement females are offered, representing an outstanding opportunity for any breeding program. Sired by elite Tattykeel Angus bulls, these heifers carry enormous breeding potential, combining strong genetics with proven maternal lines. The original breeding cows were purchased from neighbours, Lake Midgeon, with cow lines tracing back to Ardno Park and Rennylea bloodlines. Structurally very sound and well-developed, these heifers are currently averaging 444.7kg (full weight) and present ready to join to the bull of your choice. Quiet and easily handled in the yards, they offer a genuine, practical line of replacement females. The steer portion of these heifers has been sent to Jindalee Feedlot, and the dams will be offered for sale in the coming month with marked calves at foot, providing further opportunity to access proven breeding lines.
Assessor	**Craig Pellow (Level 3 Accredited)**
