Totals			6%	94%	100%

Comment on Fat Score 1 Cattle	Steers have lost their fat cover since weaning in early march and are simply adjusting to warmer weather. fat cover is minimal across the mob being mostly 2-3mm however energy levels are high and there is no concerns trucking long distances.
Vendor Bred	Yes
Stock History	Bred in light forest country north of Richmond and brought to the downs as weaners. Steers are out of a highly functional herd of moderate frame, highly fertile breeders with an excellent temperament.
Lifetime Traceable Bloodlines	Unknown Out of a herd of soft Brahman and Brahman cross cows by Brahman, Droughtmaster and Charbray Bulls.
Grazing Conditions	Good quality stand of dried off Mitchell grass on open black soil downs. Some soft green flag evident with warmer weather encouraging new growth. Returned same
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
Vendor Comments	Part of our annual turn off of steers, This line represents the Brahman portion of steers, with a small percentage of softer

	Slightly Stirry: 6 head																								
	Steers have received an extensive education and are a credit to the vendors and their weaner education program. Easily drafted through the yards with minimal input from handlers. small percentage of Steers attempted to turn around in the race or balked going into the weigh box but were easily corrected and did not fizz up under the pressure. all settled quickly and quietly once drafted.																								
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses , On foot , Vehicles

Assessor Comments	A good quality line of light weight Brahman steers standing at the perfect weight to take through the growing season. Good quality, moderate framed steers that are out of Brahman cross cows by Brahman, Charbray & Droughtmaster bulls. Steers are good soft brahman types with most having a small percentage of crossbred through them. Exceptional temperament with extensive education. These steers have had all the hard work and handling done and just need time to fill their potential. Predominately #5's 6-9 months in age with a small percentage of #4 steers 12-16 months. Quality steers with no HGP that are ideal Steers to tuck away over the growing season and turn off as heavy backgrounders, Export or feeder Steers.																								
Assessor	Ashley Naclerio (Level 1 Accredited)																								
Delivery Period	21/10/2025 to 23/10/2025 (3 days)
