Assessor Comments	A nice even line of vendor Bred Angus x Angus 10 - 12 month old weaned heifers. Heifers are bred from a large framed cow herd with Raff angus genetics and were sired by Dulverton Angus sires. Heifers present in good condition and are jus starting to loose their winter coats, given some continuous good feed and warm weather heifers should continue to grow out nicely. An ideal line of backgrounders that are perfect articles to take through the spring and summer months to turn off before winter next year or keep and finish for a domestic trade kill. Heifers to suit all end markets, grass fed and Anti Biotic free with declaration available.
