Comment on Fat Score 1 Cattle

Fat score 1 heifers are all in strong condition and fit to travel long distances, however may need to be spelled if going more than 1200km.

Vendor Bred

Yes

Stock History

Heifers bred from very fertile Medium Framed Brahman and Brahman Cross cows. Heifers were sired by Three D and Jaffra Brahman Bulls

Lifetime Traceable

100% of cattle in this lot are Lifetime Traceable

Grazing Conditions

Since weaning heifers have been grazing on red sandy country grassed with Spinifex, Buffel and Forest Bluegrass with patches of black soil flats growing Mitchell and Flinders grass.

Returned to: Fresh open downs paddock with Mitchell, Flinders, and Buffel grass

Burr/Seed in Coat

No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status

The owner declares that the cattle have not been treated with HGP at any period of their lives

Details

2 young Brahman Bulls got in with heifers for about all of March 2025. Vendor presumes no heifers were heavy enough to get in calf and I never saw anything that looked 6 months in calf.

Stirry: 7 head

Heifers are well handled and all worked very well through race draft in yards, and settled down quickly once out in big yard. They were a pleasure to work both in the crush and yards.

Handled With

Aerial (Helicopters, gyro's and planes) , Bikes , Horses

Assessor Comments

160 heifers that at assessment ranged from 251- 371 kg and averaged 305 kg. Of the 160 Heifers there is approximately 90 greys, 51 red and honey, 14 black / brindle and 5 yellow Charbray. There is 1 heifer with a small naval hernia and 1 with only half a tail. Of the 107 horned heifers about 14 have longer horns but the others have only short regrowth horns and may require trimming in the future. We started mouthing all the #3's but as all smaller 3's had milk teeth we just mouthed all the heifers over 350 kg and 70% of them had milk teeth. Their temperament is very good and they have been well handled. There is 3 family brands in the mob. These heifers would ideally be suited to grow into small to medium framed low maintenance very fertile breeders, or live export feeder heifers. Even though there is no tick on the heifers they are located in tick area and if going to tick free country, they will be cleared of tick on property or in Cloncurry at vendors expense.
