	Cattle displayed excellent temperament during assessment. All heifers flowed through the yards smoothly with minimal disturbance. The odd heifer tried to turn in the race but other than that they are quiet and easy to handle making them suitable to all experience levels.

Notable Traits	Traits 6 Head Vaccination lump		
Assessor Comments	A quality line of 10-11 month old Angus x Friesian cross heifers, currently grain-fed and showing excellent weight-for-age performance. These heifers exhibit the desirable carcass traits of top Angus genetics. They are well-grown, structurally sound, and display good depth and length through the body. Accustomed to grain and yard environments, they are forward in condition and progressing well. Their quiet temperament, combined with strong growth potential, makes them ideal for continued feeding programs or for someone to take on as future breeders. Please note vendor has 2 other lots in sale.
