Handled With	Bikes, Dogs and on Horseback. Bikes , Dogs , Horses , On foot
Notable Traits	Traits 3 Head old eye scarring not detrimental
Assessor Comments	Buyers a neat line of PTIC Angus females in calf to Ben Nevis U238 & U245. 86% of the consignment are 3 - 4 months pregnant to the sires above that were selected for their low birthweight and exceptional growth figures. The females show all the attributes to grow into great breeder cattle possessing good weight for age, length of body and depth of flank. With all these traits the heifers still remain very feminine while also showing good frame. These heifers were very easy to handle at assessment as the cattle are bred naturally quiet. The Rynne family take great pride in their cattle and spend countless hours selecting sires to complement their herd. They have significant investments in top line bulls for their commercial operation and the sires of these heifers are the sires the heifers are in calf to are no different. If you're looking for a line of well bred Angus heifers PTIC to very good quality bulls than look no further.
