Assessor Comments	A good to very good quality line of Angus and Angus cross heifers. These heifers are vet PTIC calf to Angus bulls with one red composite bulls who got into the heifers towards the back end of the joining period. They are 6.5 to 8.5 months in calf. The vendor will adhere to the fit to load guideleins with any heifers deemed to close to calving held back from loading after discussions with the buyer. The heifers are approx 85% vendor bred with the balance heifers purchased as weaners in 2024. They are being sold due to a sudden change in direction at Killara. They are medium to large frame heifers that should grow into moderate to large frame functional cows. Two heifers noted with small blue eye scarring in one eye. Please note these cattle are in the tick free zone and a clear to travel of all areas. Note 2 decks of mostly red cross heifers in this sale to make 4 decks.
