Assessor Comments	Buyers, here is a nice line of PTIC Hicks Beef composite heifers. Heifers were joined over a 8 week period to Hicks Beef composite bulls. These heifers were scanned in March to have joined in the last 2 weeks of the joining. They have been preg tested again by a vet on the 21/08/25 for buyers confidence. These are good quality black composite heifers joined to black composite bulls. Heifers are from a herd focusing on breeding strong maternal traits with above average growth rates under high stocking rates. These cattle will perform. Buyers please note how forward in calf these heifers present when considering travelling longer distances.
