Assessor Comments	An excellent opportunity to secure a quality line of PTIC Angus cows, rising 2.5 - 3 years of age, presenting in store condition with plenty of frame, bone, and stretch. These females are PTIC to commence calving in early February within a tight 8-week window. Joined to elite Murdeduke Angus sires—valued up to \$27,000—these cows reflect a strong focus on fertility, longevity, and genetic performance. Bloodlines include Murdeduke and Rossander Angus genetics. These cows are from a highly regarded breeding program at Korangamurah, known for producing functional, fertile, and high-growth cattle. The operation enjoys strong repeat buyer support for its weaner progeny. Offered only due to ongoing dry conditions in the South West. The calves were pulled off two months ago, and all cows are currently dry. Please note: one cow has an old pink eye scar. A genuine draft of young, fertile breeders backed by proven Angus genetics—ready to add value to any program.
