|                                       | Heifers that require experienced stock handling and steadying through gates and the race. The heifers were preg tested and then assessed so had a second time through the race yet only a small number fidgeted or were quicker the second time. When in a large mob and pressured they tend to circle and rush however when handled quietly and with experience are calm and easily managed. The calves are easily excitable.                                              |     |                          |                             |

| Assessor Comments                     | Good quality young future breeders PTIC to Greendale Brangus bulls. Vet preg tested 45% from 6 -8 months, 44% 4 - 5 months and 11% 1-3 months in calf. 6 with calves at foot from 33 - 106 kg to av 83kg (unbranded). The heifers were purchased in 2 main lots from the local district - a small number PTIC at that time with the majority of the Brangus & Angus cross heifers (approx 67% of the lot) #4's and the Charbray / Char cross heifers #3's (33% of the lot). |     |                          |                             |
