	Extremely quiet young females that have been handled single handedly by a 73 year-old with ease. Cattle came running at the site of a bucket and were yarded for the assessment.		
Handled With	On foot , Vehicles		
Assessor Comments	These heifers and calves present an excellent opportunity for livestock handlers of any experience level to acquire exceptionally quiet young females. All heifers calved unassisted and are proving to be outstanding mothers, raising fresh, sappy black and black baldy calves by Allunga R12 Angus bull. They have been pregnancy-tested back in calf to a Mystic Angus bull, offering the potential to split the calves off and continue developing these heifers into top-quality future breeders. PLEASE NOTE: A 10th cow-and-calf unit is also available under the same details. She was tested as non-detectable due to the bull only coming out 4 weeks ago and is offered at a discounted price.
