Steers were handled quite easily whilst assessing. The odd steer became slightly stirry when drafted off and put up the race for weighing. But overall cattle had good temperament and with further handling would continue to settle down further.

Notable Traits

Traits

Assessor Comments	Presented are 30 Angus steer weaners that are bred by high indexing Mundarlo and Milong Angus bulls. Steers are well weaned and will have good compensatory gains with the right feed in front of them. Steers are showing signs of what has been a tough Winter season with minimal feed. They were weighed in a tight weight bracket of 260-352kgs LW. Vendor has a good working herd of cattle and steers have always performed well for previous purchasers. For any more information please call assessor.
