Assessor Comments

This is an outstanding line of Angus Heifers out of a highly recognised cow herd. The heifers are by Dunoon and Rennylea

Angus genetics. The steers consistently perform to a high standard at Rangers Valley Feedlot in the long fed program. All bulls used in the herd average in the top 20% for growth carcass and maternal traits. There are 4 heifers in the mob with active pink eye at assessment, which were treated and will be followed up. The heifers had a 5 in 1 and piliguard treatment at calf marking and were followed up with a second vaccination. This vendor concentrates on IMF and these heifers will make outstanding future breeders in anyones front paddock.
