Assessor Comments	Nice run of Weaner steers, weaned early and have done reasonably well with a frosty cold winter. Drenched recently with Dectomax V, Copper Injection & B12/ Selenium so ready to steam ahead with fresh spring growth. These steers would suit a brackgounder to take through to feeder weight, or to run out to a fat steer for next year's winter contracts, steers have been running on improved pastures and have been well handled with low stress Stock handling, Have been grazed behind strip tapes which are moved 2 to 3 times a day via an auto grazing system. These steers were great to handle in the yards and Holding Areas throughout the whole assessment.
