Assessor Comments	Excellent opportunity to buy a very even line of Primeline maternal ewe lambs to be offered in two lots of 270. These lambs represent the top 35% of the Carr ewe lambs and are only being sold due to having a young flock structure, combined with their high lambing percentages (150%), leaving these as surplus to future requirements. All were individually weighed 35kg+ at assessment. These ewes will go on to produce very heavy export lambs with the 2023 drop older brothers averaging 34kg cwt off crop (see video). They have received a full health treatment and are ready to be grown out to become excellent breeders for many years to come. There is a total of 540 ewe lambs off this property and will be delivered as a run out the gate in two lots of 270 hd.
