Assessor Comments	An outstanding line of 385 Primeline Ewe lambs 43.2kg empty account Kurra Wirra P/Co. These lambs present the whole drop of Ewe lambs with none retained and a tail taken off to present a very even line with all being individually weighed 37kg + These lambs were bred out of Ewes bought in from McCorkell Pastoral who have a pure Primeline flock and purchase Rams focusing on Growth and muscle. The purchased Ewes were all multiple bearing and marked 180% lambs showing significant maternal and high fertility traits that will be passed down to their progeny. Ewes lambs are Gudair vaccinated and would make fantastic future breeders with potential buyers already having weight behind them to confidently join as Ewe lambs late Jan early Feb.
