	Very Good	60%		
Assessor Comments	Top quality "Chrome" sired ewe lambs. These ewe lambs will grow into top quality future breeders. The majority of these young ewes are already at a good joining weight and are perfectly placed to continue to mature for a joining early next year. All ewes retained in the flock have been born as a multiple for more than the last 15 years, just as these young ewes are all born as a twin. These young ewes have great bone and depth of body and are very well structured maternal sheep. The brothers to these young matrons averaged 23.88 kg carcass weight, three weeks ago showing the great carcass traits these sheep have. Top quality young ewes that you can buy with confidence.
