| Assessor Comments            | These 2022 drop Ewes are the last stage of the complete dispersal of classed in breeding Ewes from the Rowe Family. They are medium to large frame with some good showing good stretch in the body, and will present in forward store to mainly good condition, and have been on native pastures as well as feeders of barley for the last 7 weeks. The lambs were weaned off the ewes the day prior to assessment, so some ewes still had large udders. Please note the Vendors have their 2021 drop classed in dispersal ewes in the same sale. |            |            |
