	Heifers flowed and travelled well from pens, down laneways and through yards. Heifers had previously been inducted through facility and given the current warm northern climate handled the pressure of weighing, drafting and mouthling well. Heifers at times became sticky to move but once give the opportunity to move off, they looked and were easily managed.			
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , On foot , Vehicles			
Assessor Comments	Here is an opportunity to secure a line of quality Crossbred heifers bred in the ticks and northern climate. These heifers are notable performers and will shine in any environment, breed or feed these heifers will excel. Heifers have had a NIL WHP Pour-On Pre-treatment on the 24/11 at assessment. Vendor is willing to guarantee heifers Clean/Tick Free. Heifers can be scratched on farm and return to the paddock in QLD. If cattle need to cross state border and a dip/swim is required, purchaser to cover freight to certified facility and dipping costs associated.
