Traits																	
6 Head Ring worn scaring																	
Assessor Comments	An opportunity to purchase a line of light weight weaner heifers in store condition with ample compensatory weight gain on offer. The heifers in this lot will make good feeder heifers into the future. These heifers have had all the hard work done with quality education and handling. These heifers are ideal to lock up over the wet season and will bounce ahead on some fresher feed given the opportunity. There is a number of heifers with ring worm scaring present however this is considered not detrimental to their health and can be easily solved with a pesticide treatment. The vendor is only selling these cattle as they have missed recent rain events and need to sure up feed for breeding stock. Please not this vender has 2 lines of weaners in the same sale.																
Assessor	Joe Grove (Level 1 Accredited) Parallel Assessed By : Jamie Beresford
