| Handled With           | Heifers are good to handle. Vendor bred heifers have been well educated. The purchased heifers were slightly more agitated in the crush, but settled well once back in the mob.<br>Bikes , Vehicles                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Assessor Comments      | Outstanding quality line of EU Angus x Angus Heifers. These would usually be retained as future breeders. However, vendor has only retained 60 Angus heifers of the 220 available in the year drop. Heifers are very soft, easy doing, square, showing plenty of depth and quality carcase attributes. 1 heifer noted with old blue eye scarring and 2 heifers noted with ringworm. Purchased heifers are one mark, from Cassilis. Purchased heifers also do not have any management tags. Vendor is willing to get a Vet to Pregnancy Test heifers if required by the feedlot or purchaser. EU Accredited, Grass Fed & Antibiotic Free. |
