	Heifers were a pleasure to handle. They had to come through the draft and weigh box to be drafted and assessed twice and flowed very well both times. Please note the animals noted as slightly stiry were only assessed that way when they were isolated or pressure was applied either in the rush or in a yard, they quickly settled once released.

They have a live weight range 235kg to 375kg please note only one heifer weighinh over 343kg. They have an average weight of 285.8kg after a 5% delivery adjustment. These heifers would be ideally suited to replacement breeds or grow out to target the feeder or slaughter markets.
