Slightly Stirry: 10 head

The steers are very good to handle when moved throughout the yard to draft & weigh moving freely without any rush or need to block up. The steers were a little agitated when isolated in the crush and head bail for mouthing otherwise display the typical quiet temperament of the Latrobe herd.

Assessor Comments

Very good quality Droughtmaster steers 23 to 27 months. CERTIFIED ORGANIC, USDA & NATIONAL ACCREDITED & EU. The Latrobe Droughtmaster stud & commercial herd carry a great reputation as noted performing cattle in all markets. Steers that have experienced very favourable seasonal conditions and are expected to perform well either on grass or feed. I cannot emphasize enough the general good nature of these cattle, they are exceptional quality with length, bone, shape and frame to grow out further - Highly recommended. 5 family brands. The photos shown are the heaviest 260 steers as assessed and drafted across the scales due to yard space. This draft of 84 will be the heaviest run of steers in these photos. The photos depict a true and accurate representation of the lot offered otherwise. Due to the larger number assessed the curfew time ranged from 12-21 hours , the cattle were off feed and water for that period so have had a large curfew.
