Typical Northern Territory and Northern Qld bred, they can move very freely if allowed but will block up when pressure is applied. Very very good to handle in the paddock but typical to type they can feel unsettled when too much pressure is applied. They have been well handled and flowed very well through the yards and race, stood well on the scales that were not centered in the crush.

Assessor Comments 3 Decks of 94 Charbray, Brangus & Brahman cross steers. Steers have been bred in the North and have been on the downs at Aramac since August and have been doing 0.36kg per day since arriving. Bred from Brahman, Brangus and Charbray bulls in a Brahman X Cow herd presenting as a line of 60% Flatbacks and 40% Brahman X types (Mid to medium hump). HGP-treated with Compudose 400 in late '24 or May '25. Branded #5 or 2nd round - late branded #4's (One #3). They present in store to forward store condition and have a tight weight range of 316kg to 400kg, av 341kg after mustering and an 15 hour overnight dry curfew. These steers are really just starting to hit their straps after arriving as lighter condition cattle, ready for good grass finish or early entry onto grain. All cattle were mouthed to be 51% Milk Teeth, 45% Two Teeth and 4% Four Teeth, (any teeth that had been lost were bumped up in class). ** Buyers can either remove or take a $50 per head discount on the four - 4 teeth steers.
