Vaccinated	13/01/2025	SingVac Bolulism (brand)	First Dose
Vaccinated	13/01/2025	5 in 1 (branding)	First Dose
Vaccinated	13/07/2025	5 in 1 (weaning)	Second Dose

Chemical Residue: Clear - No known history.

Vendor Comments	These steers represent a normal turnoff and the tops of the drop. These have on average gained approx. 33kgs over the last 36 days. The 3 Angus steers in the lot are progeny of some purchased Angus cows and calves.

Temperament	Yards	Crush	Paddock
	Quiet: 82 head Slightly Stirry: 2 head	Quiet: 80 head Slightly Stirry: 4 head	Temperament not assessed in Paddock

Steers were excellent to handle in all areas of the yards. They displayed a calm disposition out in the bigger yard while being photographed and evident in the video. There were the usual small percentage that did resent being in the crush but settled very quickly once let out and back into the mob. Buyer is urged to allow these time to settle on arrival before showing them the gate.

Handled With	Bikes , Dogs
Assessor Comments	Buyers, here is an attractive lot of steers for your competition. These have presented very well considering the dry seasonal conditions and most are doing well on the supplementary pellets. All things considered they do show fantastic growth and weight for age with most of these demonstrating good muscle development, depth of barrel and bone. You can really see the genetic gain of the Palgrove bulls kicking into this herd. The weighing indicator did show a range of weight gain, some putting on plenty and some marking time but averaged right through almost 1kg/day for the past 36 days. These will suit all feedlot markets, both export and domestic. They are accustomed to putting their head in a bin so they should adapt quickly in a feedlot scenario. All steers look to be very healthy, clear in the eyes and clean noses. These were mustered early in the morning and walked 7kms to the yards to be assessed at 3pm in the afternoon. Very quiet steers to handle in all areas of the yards.
