Assessor Comments	Buyers an opportunity to purchase good quality flat back cattle bred in lighter country. The steers have been bred in forestry country in the Miles area and have been weaned onto better soils in July where they experienced a tough enough winter. This being said these cattle have really hit their straps after fortunate amount of early rainfall and good follow up rain the steers have had enough green feed for long enough that the cattle are performing very well now the weight is sticking to them. The cattle have cleaned up exceptionally well since inspection a fortnight ago and have put on better than average weight gain since last weighed on 23/11/25. The cattle possess good frame and bone and would make great 100 day cattle in no time if kept going forward on fresh feed.
