3 Head	Slight white on udders/ extending up underline/flank on 3 cows
1 Head	Very slight white marking on underline/navel of 1 heifer calf

Assessor Comments: A good line of quiet Angus & Angus cross heifers, on their first calf. This line of 1st calvers were purchased ex AuctionsPlus, as part of a larger consignment of PTIC heifers out of OAKEY district QLD, before being calved down & mothered into smaller lines. Heifers present as mostly well grown with good frame and sleek coats. They are producing a good supply of milk, which is nourishing an attractive line of marked & vaccinated Angus sired calves at foot. Presenting in very fresh condition, these heifers possess a good amount of stretch and robustness associated with the addition of the ultrablack infusion in the breeding, whilst maintaining all the desirable Angus traits of carcass shape and softness. These heifers represent a well balanced fusion of high quality carcass traits and fertility combined with the stretch, sleekness & adaptability to a versatile range of grazing enviroments. Great opportunity to replace old breeders with 1st calvers at favourable changeover rates
