Assessor Comments	These cows present an opportunity to secure industry leading genetics in the Brangus and Ultrablack breeds. They have been bred from cows purchased from the Palgrove stud herd as weaners and are sired by Brangus bulls. They have since been run on coastal country at Koumala. They have a positive preg test to Brangus bulls that represent some of the strongest American Brangus genetics. The American bred Brangus bulls provide extra bone and frame while offering a clean coat. These cows have done well to maintain a strong fertility record and grow into good framed cows while been run on the coast. As noted these cows will calve in a 60 day window early in the season. 1 cow presents as having a slightly stirry temperament in the yards.
