Assessor Comments	A top-quality line of Shorthorn heifers that have been running with a Shorthorn bull. These heifers are very impressive and would fit in well with any Shorthorn herd. Heifers were born & bred on the Research Station from various different bloodlines as part of a multi-breed trial. They are not required anymore, so they are hitting the market. Heifers avg 490kg at assessment. Heifers should continue to grow out into large heavy frame cows if given the opportunity. Top quality heifers for many years to come.
