Assessor Comments A good quality line of well bred & well grown Angus first calf heifers & calves. These heifers are displaying good frame for age & are presenting in fresh to forward store condition & are doing a terrific job nurturing a very even drop of sappy calves at foot which are exuding quality & are promising good carcass shape & softness as they mature. With their quiet nature, & depth of quality through the breeding, thanks to well regarded FERNHILL & JAROBEE Angus genetics, these 1st calf units are sure to compliment any Angus breeding operation. An excellent opportunity to secure a decent line of Angus first calves, with the option to put together another line of 34 also offered by the vendor this sale, & be well positioned to capitalise on a very strong & projected even stronger cattle market moving forward.
