Assessor Comments	On offer is an excellent line of Vendor bred black cows that are PTIC to Hazeldean Angus bulls to calve down for a March/April calving. The cows themselves have a Black Simmental Infusion, scaling from approx 30%-60%. This gives the article excellent Hybrid Vigour and milking ability, allowing the offspring to take advantage full advantage of potential inherited growth capabilities, while keeping the black coat. The average live weight of these cows is a good indication of the large frame they carry for their age and will mature into excellent large frame matrons. Please note there is a good percentage of cows that have white on their udders, however nothing on the naval. Buy with confidence, these are genuine breeders that will compliment any beef operation.
