Assessor Comments	An excellent opportunity to secure a line of genuine breeder EU Angus cows that are the result of 10+ years of selective AI breeding. The Borderdowns cattle are medium to large frame and turn off weaners in a range of 350-400 kgs consistently. These cows present in forward contrition and have been classed every year to be available in the annual turn off of 7.5 yo cows. These cows have been joined to sons of Chisum S6175, and have been 100% Pregnancy Tested in calf at assessment and certificate is available. A total of 10 cows were mouthed at assessment with all being sound with the exception of 1 cow with a broken mouth, please see photographs for reference. The Borderdowns cattle come with my highest recommendations and these girls will continue to turn off outstanding calves. These cows are in 1 line of 84 and will be sold a 2 lots of 42 as a run out of the gate.
