	Heifers demonstrated some nervousness whilst working through the yards, & did not enjoy being isolated. Some heifers generally took exception to being mouthed whilst standing on the weigh platform, but settled when released from the head bail. Heifers were generally comfortable to work through the yards, with the more nervous heifers looking to exit the crush or confined spaces swiftly.

Notable Traits	Traits 6 Head Light to moderate blue scarring in one eye of 6 cows 1 Head Pink eye in one eye of one calf, which has popped the eye. treated with Orbenin at assessment 4 Head Slight white udders on 4 cows 1 Head Small ringworm-like scar above the left eye on one cow			
Assessor Comments	A nice line of one-mark Rennylea Angus blood 2nd calvers, with Rennylea sired calves at foot. These cows are mostly medium in frame, with a half a dozen smaller frame cows throughout. Cows have carried a calf through a very cold Winter in the Southern Tablelands which has contributed to their store condition, however they have shown very good weight gains since calving. They are producing a good supply of milk, despite lacking condition, which is nourishing the young, even drop of calves, which were marked & vaccinated at assessment. Cows are presenting in store condition & displaying a little rub in the coat. Having access to only a short pick of dried-off feed, they offer the purchaser a good opportunity to put considerable weight on quickly, through compensatory weight gains with access to more abundant pastures. Ideal units to improve by adding weight, & in turn, value to both cow & calf alike. Vendor is offering another 2 lines of very good quality first calvers this sale also.
