Handled With	Very well handled quiet replacement breeders. Bikes , Horses				
Assessor Comments	Good young replacement breeders. Buyers this herd is strict on fertility, temperament and mothering ability, those that return with no calf or PTE are never retained in the herd. These young cows are proven to be successful and will complement any herd or make great turnover articles. They are doing a good job on the calves, and look to be picking up in body condition themselves as this property had been missing the earlier storms & rain. This is a genuine sale to down size the breeder herd as rain events have been infrequent. Genuine composite bred cows & calves that will complement any herd. The sires of these calves & another line of younger cows are available in same sale. I highly recommend these breeders.
