Assessor Comments	A nice line of well grown, Angus & Angus cross heifers with their first calf at foot, sired by GLENAVON, GRANETA & U8J Angus bulls. These heifers are well developed, exhibiting good frame for age & plenty of stretch. They are producing good milk, which is evident in the sappiness of the marked & vaccinated calves at foot, which are 2-12 weeks of age & exhibiting good early shape & muscle. These heifers are displaying the characteristics & traits of being well bred, with some Santa influence in the breeding of a percentage of these heifers putting extra stretch & shine throughout their conformation. A great opportunity to secure a quality line of young Angus & Angus cross breeders at the height of their production, with quality Angus sired calves at foot. With prime old cows currently selling well, they offer real value & an attractive change-over opportunity into younger breeders, with very little out of pocket expense & a bonus calf by their side.
