	Steers moved efficiently through the yards during assessment process. The odd steer wanted to push forward in the race while being weighed but generally steers are respectful and easy to handle.

Assessor Comments	Offered is an outstanding line of 102 weaned Angus Steers. These steers are the tops of the 'Weowna' Autumn calves and come highly recommended. Steers are 9 - 10 months old and weighed 348kg full at assessment. Calves are up to date with all their animal health treatments and have been since birth. The 'Weowna' herd is KO, Aristocrat and Alloura Blood with a focus on high IMF and growth in bull selection. Standing on plenty of frame, these steers are in healthy forward condition and have bounced back after being yard weaned and bunker fed in early December. The "Weowna" steers are renowned performers with buyer returning annually. A great opportunity to purchase the tops of the vendors calves in a full B-Double load. Please note the next draft of 62 head are also offered in today's sale allowing the purchaser to put together 164 one-mark steers.
