These heifers are easy to handle but do have a little bit of run in them. I would expect these cattle to settle quickly with a bit more handling.

Assessor Comments	These are an exceptionally well-bred line of EU accredited Rennylea blood Angus heifers which weighed 367kg (301-423kg) with a two-hour curfew at assessment. Due to the season, they are lighter in weight than they normally would be but will compensate quickly on improved nutrition. They are all preg tested empty and are reproductively sound (freemartins removed) and a large tail end has been removed from the line. They would be ideal to join for an autumn calving program, go onto feed or grow out on grass to MSA kill weights. The Taloooby herd has a very good reputation for growth & marbling, targeting the high end feeder steer market. These are a very attractive proposition to purchase high quality heifers from one of the leading herds in the district with plenty of upside.
