Assessor Comments	A good to very good line of Angus Heifers. Heifers presenting in forward & forward store condition at time of assessment. Heifers have been in a rotational grazing system since weaning & flowed well from the paddock, into the yards. Sired by Milwillah, Te Mania & Glenoch blood bulls, (prioritising high IMF and EMA for selection of bulls and retained females). These heifers should suit a breeding operation, alternatively put through the feeder job or kill a quality carcass down the track. Heifers had Rhinoguard & Bovishield MH1 at marking (See health treatments for details) NOTE: 3 heifers presented at assessment had mild blue eye scarring. 3 Heifers had white before the navel (as seen in videos). 11 Heifers have white on their udders.
