Notable Traits

	Traits
1 Head	Blight scarring

Assessor Comments	Well handled young flat back steers showing good weight for age, & breed characteristics. Tidy around the head and given a insecticidal ear tag has these steers presenting in good condition & going forward. These weaners have been bunk trained as they've had a small amount of palm kernel and calf pellets post purchasing last year. This is in my view a great attribute as they are all now healthy in their gut & growing well. These steers appear to have not had a set back. This line of steers are suited to both the domestic & export markets at the desired weights. I recommend these steers.
