Assessor Comments	A terrific line of EU ACCREITED Angus heifers bred from a herd with over 30 years of focused Angus genetics. The vendor places strong emphasis on high IMF and growth, consistently buying bulls with top end genetics to drive herd performance. These heifers are well grown, quiet, and present a great opportunity to add high performance bloodlines to your herd. Buyers note there was a bull found in with the mob and was removed in early January. Heifers were pregnancy tested 16/02/26. 31 were considered to be non-detectable and 15 were found to be under 2-months in calf. These 15 were vaccinated with Juramate Prostaglandin on the 16/02/26. Three heifers have old pink eye scaring in an eye but doesn't appear to be affecting their sight in any way. Three heifers have a little white on their udder. There is another draft of 48 in the same sale, and they will be delivered as a run out the gate with a focus on delivering even lots if there are multiple buyers.
