	An absolute text book example of what weaned calves are supposed to come out like! A credit to all involved, a pleasure to handle. Not a sound in the yards throughout the entire assessment process.

Assessor Comments	A neat B Double load of absolute "A Grade" Angus weaner steers. July / August drop calves from a longstanding Temania based herd. Calves have been weaned for a month onto Lucerne hay and Johnsons Hay based pellet. Present in top notch condition. Eyes are very good given the weaning and dusty conditions. Any blemished eyes have been removed. The temperament is faultless, not a sound or misstep from anyone throughout the entire process. You will go a long way to find a better presented line of weaner steers this autumn. Highly recommended
