Assessor Comments A/c Bonoak present an outstanding line of 75 classed in, pregnancy-tested empty yearling heifers, predominantly carrying top-quality Ardrossan Angus bloodlines. These heifers offer genuine dual-purpose appeal. For the feedlot buyer, they have been set up correctly, having received their first Bovilis MH + IBR vaccination on 14/01/26 and have been supplementary grain-fed since 04/01/26. They are PTE and present in forward condition, weighing 432–520kg (full) at assessment, with the frame, weight, and performance capacity to continue powering ahead on a full grain ration. For Angus breeder operations, these females display strong maternal traits, structural correctness, and the depth and softness expected from quality Ardrossan genetics. With their sound structure and proven bloodlines, they represent an excellent foundation for future breeding programs. An even, well-grown line of versatile heifers suitable for both short-term performance and long-term genetic investment.
