| Vendor Comments               | Steers are apart of a backgrounding program and have been doing well and would have normally taken to much heavier weights but due to continuing dry conditions have to be sold early. |            |                   |

| Assessor Comments      | A Good quality line of Angus x Angus steers that are ideal feeder steers. Majority of steers were purchased as weaners back in Aug/Sep of 2025 out of the Hunter Valley region with a few Vendor bred steers in the mix, Steers have grown out well and are now ready to be finished. Steers are set to go immediately in to the Feedlot as they are at the right age and are all frame that offer great compensatory weight gains, steers averaged 403 Kg's full at assessment. Great feeder types not to be missed. |                                           |                                     |
