Notable Traits	Traits 10 Head blue eye scarring			
Assessor Comments	52 vendor bred heifer weaners. From a line of excellent quality cows. All top quality genetics used from premium bloodlines. Waitara Angus are bred to be fertile, functional, medium frame, mid maturity females that calve at 2 years of age and every year after. Haddon Rig's Angus herd have always been performance cattle with above average performance at major feedlots. These cattle also do equally as well as grass fatteners, with moderate frame sizes and early maturity along with good IMF figures facilitating good carcass data. Vaccinated with 7 in 1 and backlined with Ivermectin , these heifers are paddock ready upon delivery. Ideal premium quality cattle. Can sign a grass only declaration for grass, if needed. All calves with active pink eye also removed at assessment.
