Handled With	Bikes , Vehicles																								
Assessor Comments	These steers are only 7-8 months of age and have been weaned for approx. 6 weeks. steers are currently grazing dry native pastures and appear to be on the move. these steers are grass fed eligible, also have a very strong reputation for their feedlot performance These steers are progeny of the highly regarded Greenhills Shorthorn cow herd along with some high quality angus cows. they are sired by Millah Murrah angus sires please note there is the odd blue cloud in eye, however in general eyes are very clean.there is the odd old ring worm scarring(not detrimental) please note that these steers are predominately black in coat colour, with some blue roan and brindle through a small amount.(please refer to photos for better visual description)
