Very quite young steers to handle. A bit confused in the yards at times, getting stuck in corners, only as a result of having

| | |
|---|---|
| | their bellowing mothers on the other side of the fence. Once they realised the pressure from the handlers, they moved off easily, all led up the race very well, just a few (4) steers showing some anxiety on the shiny aluminium scales and doing a bit of jumping about. Very quiet, well handled steers that will only improved with weaning. |

| Assessor Comments | Very nice line of young, fresh steers to take on, showing excellent growth for age, averaging 274kg while having only ever known dry/droughty conditions in their short 6/7 month life. Steers that have been superbly managed, never seeing a hard day, and are backed by breeding. With some green feed coming through now the timing is perfect & these calves will just keep going forward upon weaning. Out of large/very large framed cows, these calves will have the scope to carry a heap of weight and make a feeder by the Spring time. Buyers please note. These Eye weaned at assessment, please consider this in your adjustments. |
